Fundamental to the skills agenda in Wales, Essential Skills qualifications enable learners to develop their knowledge and application of number, communication, digital literacy and employability. Essential Skills qualifications help learners to develop and demonstrate that they can apply these vital skills to a range of situations whilst at work, in learning and throughout life.

Essential Skills Wales qualifications and training courses

The Mathematics department prepares students with strong skills in mathematical communication, problem-solving, and mathematical reasoning. This solid foundation enables students to transfer to other institutions of higher education, pursue advanced studies in math or related disciplines, and be prepared with occupational and technical skills to meet the needs of business and industry.

A VIEW OF MATHEMATICS Alain CONNES Mathematics is the backbone of modern science and a remarkably efficient source of new concepts and tools to understand the reality" in which we participate.

A VIEW OF MATHEMATICS Alain CONNES

A comprehensive and coherent set of mathematics standards for each and every student from prekindergarten through grade 12, Principles and Standards is the first set of rigorous, college and career readiness standards for the 21st century. Principles and Standards for School Mathematics outlines the essential components of a high-quality school mathematics program.

Principles and Standards - National Council of Teachers of

Essentialism is the view that every entity has a set of attributes that are necessary to its identity and function. In early Western thought Plato's idealism held that all things have such an "essence"â€”an "idea" or "form". In Categories, Aristotle similarly proposed that all objects have a substance that, as George Lakoff put it "make the thing what it is, and without which it would be not ...

In mathematics, the support of a real-valued function f is the subset of the domain containing those elements which are not mapped to zero. If the domain of f is a topological space, the support of f is instead defined as the smallest closed set containing all points not mapped to zero. This concept is used very widely in mathematical analysis
