Recommendations for the Evaluation of Left Ventricular

Heart rate variability (HRV) is the physiological phenomenon of variation in the time interval between heartbeats. It is measured by the variation in the beat-to-beat interval. Other terms used include: "cycle length variability", "RR variability" (where R is a point corresponding to the peak of the QRS complex of the ECG wave; and RR is the interval between successive Rs), and "heart period ...

Heart rate variability - Wikipedia

Heart rate is the speed of the heartbeat measured by the number of contractions (beats) of the heart per minute (bpm). The heart rate can vary according to the body's physical needs, including the need to absorb oxygen and excrete carbon dioxide. It is usually equal or close to the pulse measured at any peripheral point. Activities that can provoke change include physical exercise, sleep ...

In this comment we address the preprint of Jha and Hirata (arXiv:1809.10316 [physics.chem-ph]) which claims "Numerical Evidence Falsifying Finite-Temperature Many-Body Perturbation Theory." We agree that finite difference differentiation of the exact grand potential is the correct way to verify the terms in the perturbation expansion.

Introduction. ECGs record the electrical activity of a person's heart over a period of time. Physicians use ECGs to detect visually if a patient's heartbeat is normal or irregular.

2.2 Pulse Transit Time Difference. The pulse wave velocity (PWV), which is the velocity at which the arterial pulse propagates through the circulatory system, is considered to be a suitable parameter that reflects the blood pressure [1]. On the other hand, the pulse transit time (PTT), which is defined as the time required for a pulse wave to travel from the heart to a peripheral site, is ...

Real-world streaming analytics calls for novel algorithms that run online, and corresponding tools for evaluation. Anomaly detection with Hierarchical Temporal Memory (HTM) is a state-of-the-art, online, unsupervised method.

Unsupervised real-time anomaly detection for streaming data

This study originally arose out of an e-mail discussion with Rafael Capurro at the artefactphil discussion group in 1999. I am therefore indebted to him for important impulses. Cf. Rafael Capurro's analogous article Beitrãge zu einer digitalen Ontologie (Contribution to a Digital Ontology), from which the present study deviates considerably in both content and scope of presentation.
