

genetic databases socio ethical pdf

article highlights. Pharmacogenetics is poised to provide medical practitioners with crucial information about their patients'™ responses to various prescription drugs, effectively expanding upon current dosage guidelines by identifying what, if any, genetic variants exist in each individual.

ActionBioscience - promoting bioscience literacy

A biobank is a type of biorepository that stores biological samples (usually human) for use in research. Since the late 1990s biobanks have become an important resource in medical research, supporting many types of contemporary research like genomics and personalized medicine.. Biobanks give researchers access to data representing a large number of people.

Biobank - Wikipedia

Genetically modified food controversies are disputes over the use of foods and other goods derived from genetically modified crops instead of conventional crops, and other uses of genetic engineering in food production. The disputes involve consumers, farmers, biotechnology companies, governmental regulators, non-governmental organizations, and scientists.
