Guide to the IPC (2018) page 2 HISTORY OF THE IPC 8. The text of the first edition of the Classification was established pursuant to the provisions

### **Guide to the IPC (2018) - WIPO - World Intellectual**

Lasers are distinguished from other light sources by their coherence. Spatial coherence is typically expressed through the output being a narrow beam, which is diffraction-limited. Laser beams can be focused to very tiny spots, achieving a very high irradiance, or they can have very low divergence in order to concentrate their power at a great distance.

The main advantage of particle beam weapons is they have penetration that make lasers look like throwing a handfull of thistledown. The main drawbacks of particle beam weapons is they are power hogs, they are

difficult to reduced to pistol size, and Terra's atmosphere will scatter enough of the beam to give the firer a lethal dose of radiation.
