Short information for the beginners: Self-propagating high-temperature synthesis (SHS) means the synthesis of compounds (or materials) in a wave of chemical reaction (combustion) that propagates over starting reactive mixture owing to layer-by-layer heat transfer. (See photo)

About Self-Propagating High-Temperature Synthesis

Laurel is running a Vigilante in a two-player gestalt game at the moment (Curse of the Crimson Throne). It fits well thematically, and is well-served having a single urban location for much of the adventure (not to mention that the low number of players allows it to be a focus).
