GPU computing is the most accessible and energy-efficient path forward for high performance computing (HPC) and the data center. In fact, five of the six Gordon Bell Prize finalists use supercomputers powered by NVIDIA GPUs.. Today, NVIDIA powers the fastest supercomputers in the U.S. and Europe, as well as some of the most advanced systems under construction.

A supercomputer is a computer with a high level of performance compared to a general-purpose computer. The performance of a supercomputer is commonly measured in floating-point operations per second instead of million instructions per second (MIPS). Since 2017, there are supercomputers which can perform up to nearly a hundred quadrillion FLOPS. Since November 2017, all of the world's fastest ...

The International Journal of High Performance Computing Applications provides a lively forum for the communications of original research papers and timely review articles on the use of supercomputers to solve complex modeling problems in a spectrum of disciplines.. The emphasis will be on experiences with the use of supercomputers rather than on the exposition of computational results peculiar ...

The Performance Ranking of Scientific Papers for World Universities or NTU Ranking is a ranking system of world universities by scientific paper volume, impact, and performance output. The ranking was originally published from 2007â€“2011 by the Higher Education Evaluation and Accreditation Council of Taiwan (HEEACT) and has been published since 2012 by the National Taiwan University.
