To install the actual application, just upload and extract the TestRail installation archive to your web server and copy the files to your web server's www directory (e.g., on Ubuntu it's /var/www/testrail). Some Unix systems do not support the unzip command by default, so you might have to install it first (example shows Ubuntu/Debian):

Very few frameworks, by their nature, let you turn themselves into your tool. I am by no means a very experienced framework user, but I have been through Wordpress, Django, Celery (Python), JQuery, RedMine, and some others, and have not to date been in a position where I could turn either of these into a tool I could really wield.

Frameworks don't make any sense - good coders code, great
